‘OUR PARTNERSHIP WITH MERENDA GAVE US TOP QUALITY VENEER COMPONENTS ON TIME AND ON BUDGET.’

Ellis Christian

Workshop Manager, Beck Interiors

50 x 45mm MDF core wrapped in Teak veneer. See the front cover photo to see how they were used.

“**Our design team** delivered a design for our client that required all our knowledge and expertise to produce. There was a requirement for several different veneered components which had to be produced from the same batch of real wood veneer.”

“**From point of** sampling through to final project completion, the Merenda team worked with and supported us allowing us to deliver on all our client needs.”

About Merenda Surface

What is it

Merenda Surface offers a bespoke veneer solution for any furniture component that may exist within a space; whether it's for wall panelling, doors, gables, door frames, doorsets, or kitchen cabinets- if it's got a surface Merenda can veneer it.

Why choose us

Many companies do not have the facilities or the expertise in processing veneer- Merenda do! We have spent the last 30+ years in resolving design led challenges around veneer. We are known within the industry as experts in natural veneer and also specialise in using dyed veneers like Tabu and Alpi.

Wrapped Mouldings

Wrapped profiles are typical components in the manufacture of modern furniture and building interiors. Applications can include furniture decor, wall and ceiling panels or doorframes and architraves. The Profile can be wrapped on the a diverse range of base substrates, most typically MDF or Chipboard and the wrapping veneer can be chosen from an endless variety of veneers including natural, exotic or dyed.
